

OFMA CHART FOR VFR FLIGHTS
1:500 000
designed for flight in VMC

Mission Statement

The mission of the project is to develop and maintain a universal database of aeronautical data, in order to facilitate the rendering of high quality VFR maps to assist the general aviation community.

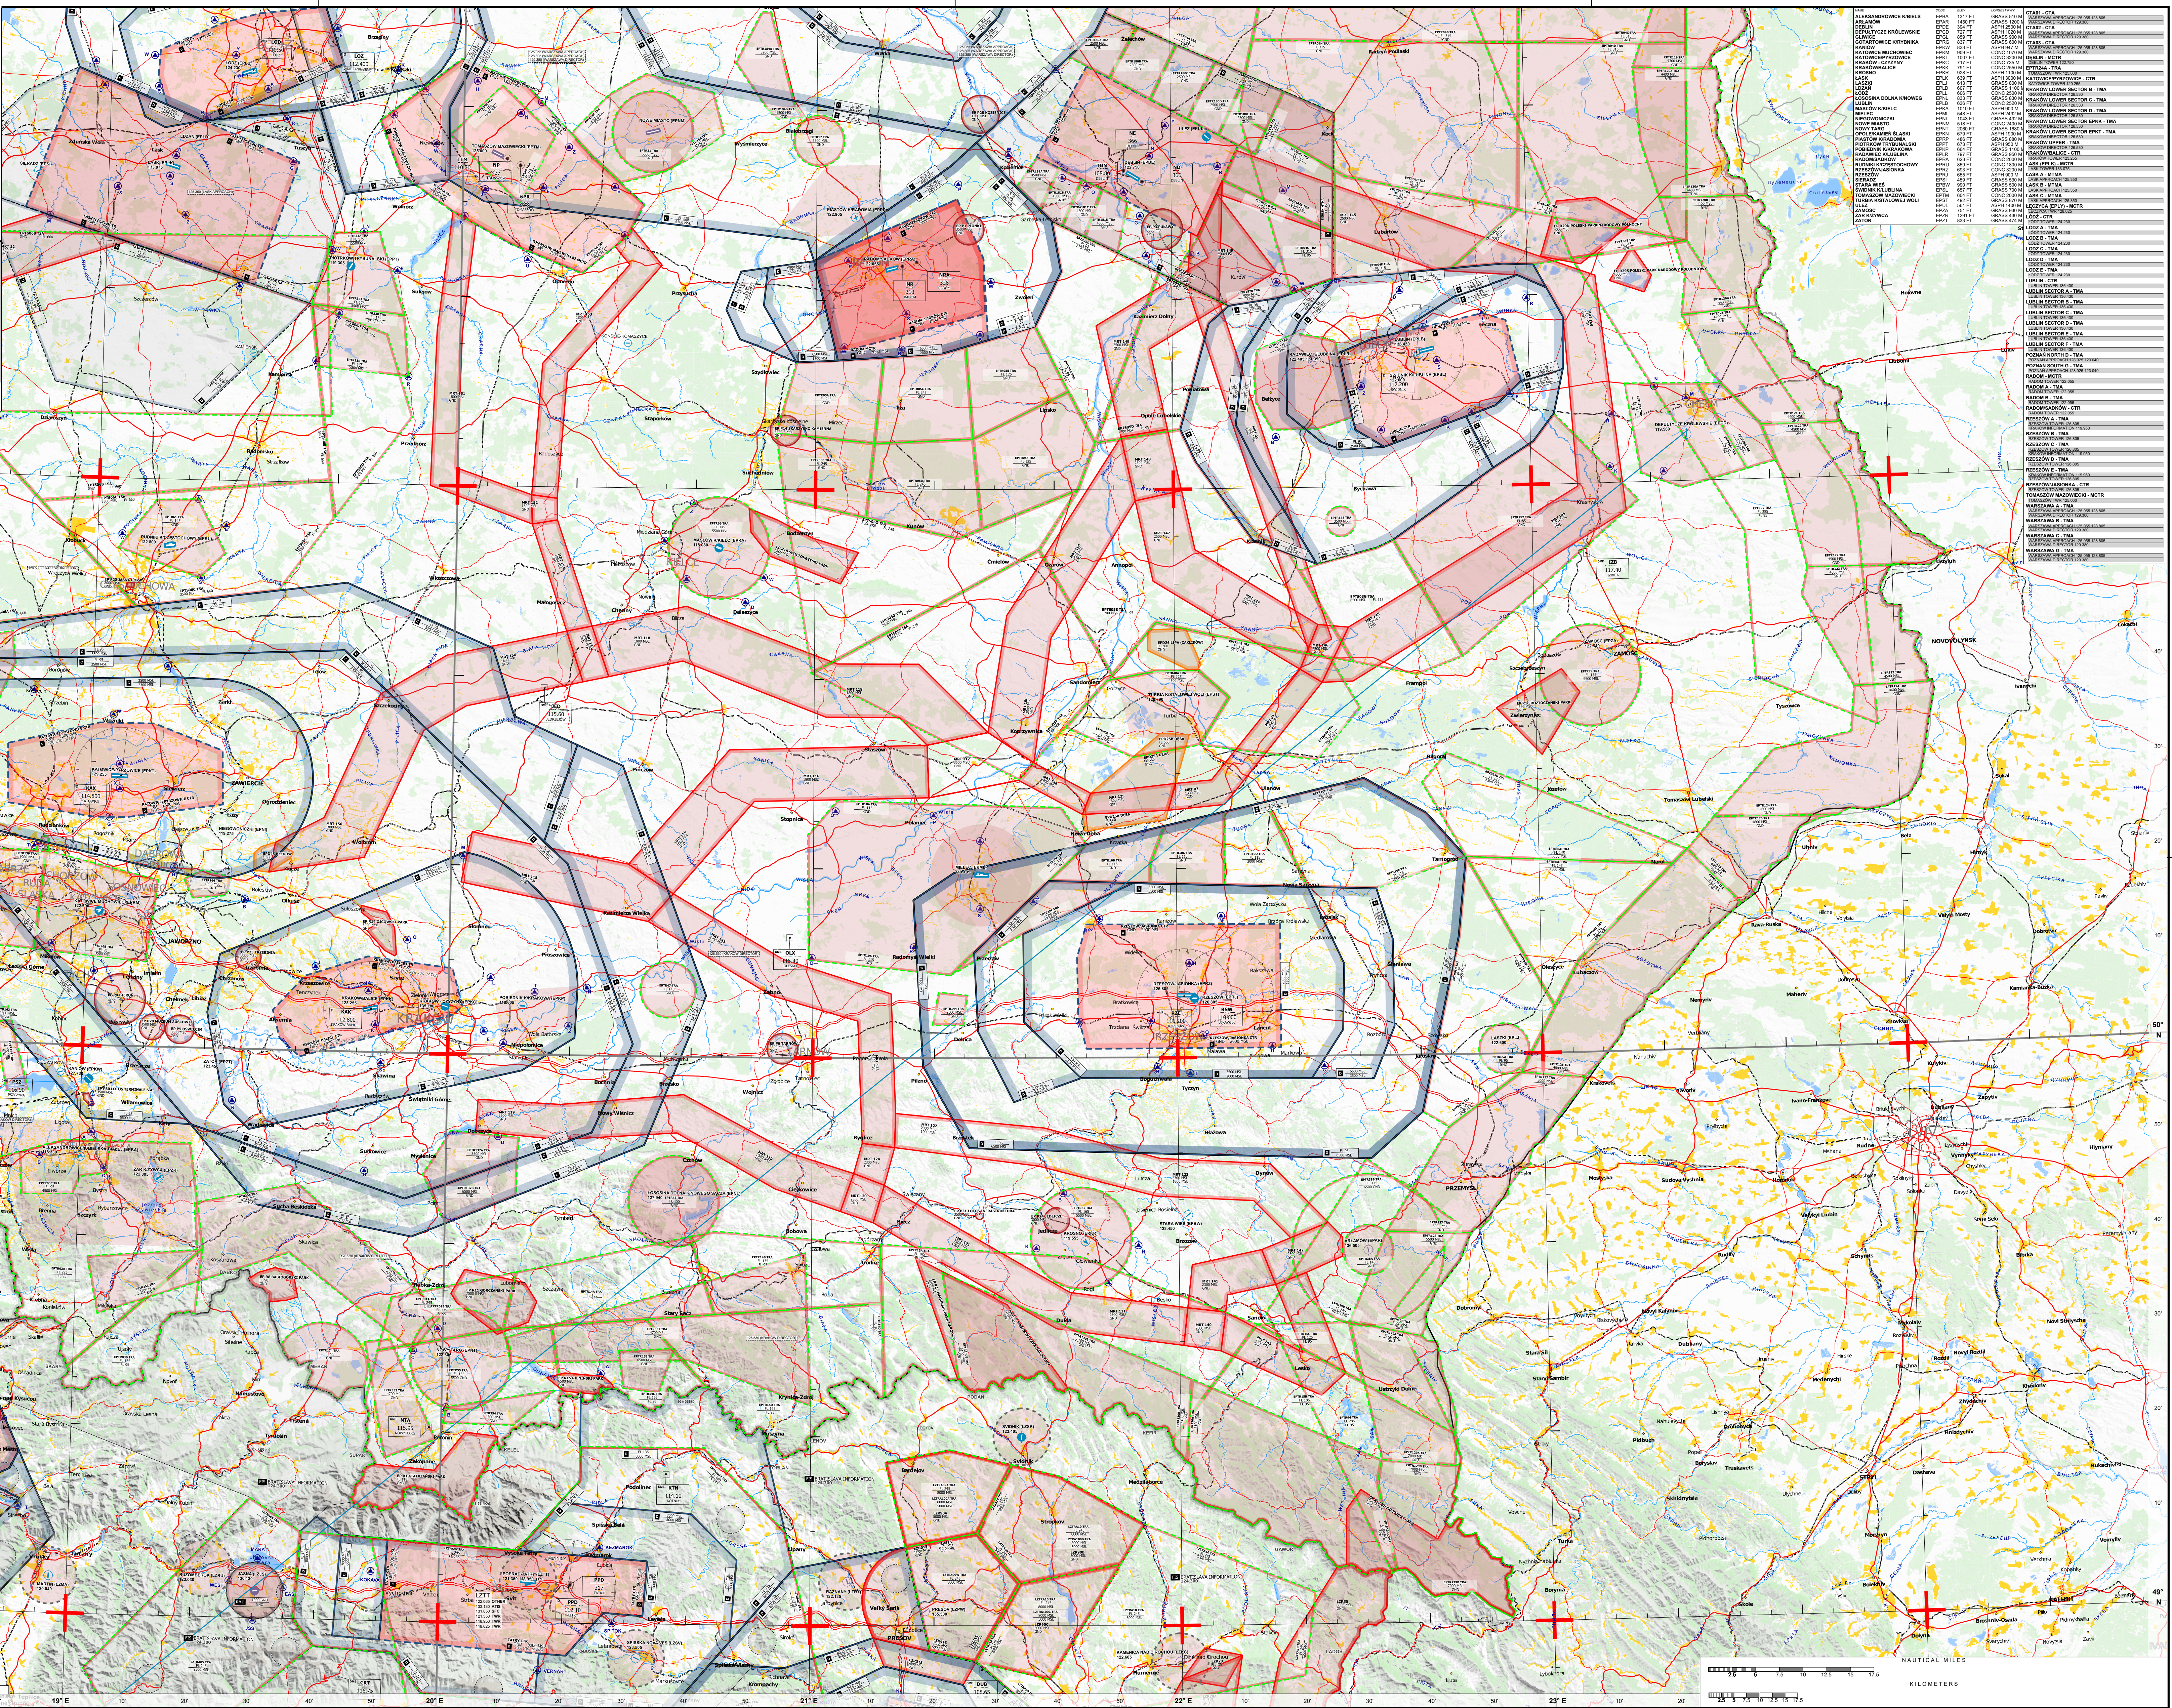

As the name suggests, a key part of the project is that it is an open source project which will coordinate the work of a large community of volunteer contributors. The OFMA is a 'not for profit' organisation that has no commercial interest.
